

HANNAN BLISTER SEALING MACHINE 511S

- Blister to card sealing still very popular for hand sell packs
- The Hannan 511S is a twin shuttle machine, which utilises the benefits of inexpensive wooden tooling, allowing the machine to be operated by up to two (2) operators for maximum output, when required.
- Stationary heat platen (eliminates thermostat probe breakdown common to moving platen sealers)
- Fully enclosed sealing chamber (for safer operation)
- Production monitor (push button reset)

SPECIFICATIONS:

Seal Area:	305mm x 457mm or 457mm x 610mm
Max Blister Depth:	100mm
Overall Height:	1030mm
Overall Width:	762mm – 915mm
Overall Length:	1219mm - 1676mm
Temperature Control:	38 – 315 degrees
Power:	415V, 3Ph, 20Amp
Air:	Max 6 bar

** External compressor required **
